

HCPro

Training healthcare professionals for more than 20 years.

Code it right the first time

A little time now saves a lot of time later

Are you concerned about losing productivity to lengthy training sessions? With HCPro's eLearning Library, you can conduct training in smaller sessions, spread out over time. Staff will lose less time from regular work activities and they won't suffer from information overload.

You can select the courses staff need from the library of more than 50 titles, and check their understanding as they learn with "Test Your Knowledge" practice questions. You'll be sure they are applying codes correctly as they master the material.

There's a learning track for all coders, whether they need training on outpatient coding or inpatient coding issues. Beginner and intermediate-level course are clearly identified. You'll find a range of topics from anatomy and medical terminology to updates for veteran coders on ICD-9-CM and CPT changes.

HCPro can help you increase the productivity of your staff and build the proficiency, confidence, and knowledge to do the job right the first time.

Take a look at the course list:
